Functional Requirements Specification (FRS)

Document Title: Functional Requirements Specification for Overseas Placement Portal

This Functional Requirements Specification (FRS) document provides a comprehensive blueprint for an online portal dedicated to facilitating overseas placement opportunities for youth of Himachal Pradesh. The proposed system aims to streamline job matching, reduce migration risks, and promote safe, regulated international employment.

The portal will serve job seekers, recruiting agencies, and administrators, enabling efficient registration, job postings, applications, and support services.

1. Introduction

1.1 Purpose

This FRS delineates the functional and non-functional requirements for developing a secure, user-friendly online portal to support overseas employment placements for youth. By centralizing job opportunities, candidate profiles, and support resources, the portal mitigates exploitation risks associated with unregulated agents and fosters economic mobility. The portal emphasizes verified job listings, candidate registrations, and grievance mechanisms, while incorporating modern enhancements for improved accessibility and efficiency.

1.2 Scope

- User registration and profile management for job seekers and recruiting agencies
- Relevant document to be uploaded by candidates
- Job posting, searching, and applying for jobs
- Scrutiny of candidates and scheduling of recruitment drives and interviews by recruiting agencies
- Entry of placement details and issuing of appointment letters to the selected candidates by the recruiting agencies
- Acceptance and confirmation of job offers by the candidates
- Support features include dashboards, FAQ's, grievances, notifications, and informational resources.
- Administrative tools for content management, approvals, reporting, and admin oversight.

- Bilingual interface (English and one regional language, e.g., Hindi).

1.3 Definitions:

- Job Seeker: Candidate seeking overseas opportunities.
- Recruiting Agencies: Entities requesting candidates for overseas placement.
- Administrator: Authorized personnel managing the portal.

2. Functional Requirements

2.1 Product Functions:

The portal will:

- Facilitate secure user registration and profile creation.
- Enable job postings by verified recruitment agencies and targeted searches by job seekers.
- Support document uploads, application submission, and tracking of application status.
- Provide informational and support services, including training notifications and grievance handling.
- Offer administrative dashboards for monitoring and reporting.

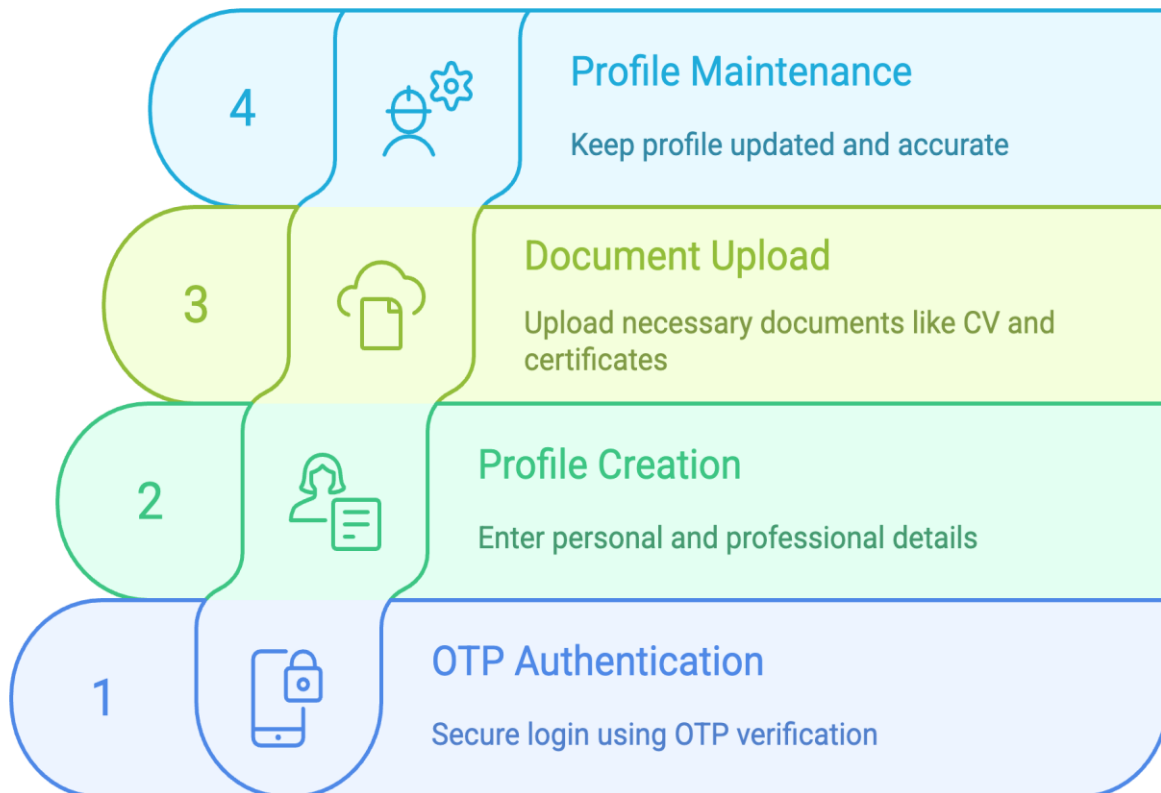

2.2 User Roles and Modules

User	User Responsibilities	Features of User Module
Candidates	Register, upload documents, apply for jobs, view application status.	• Registration & Login - Aadhaar-based or email/mobile verification - SSO login (HIM Access) - Personal details, education, work experience - Preference of the Job roles, Countries • Profile Management - Edit/update profile information - Upload documents (CV, passport, certificates) • Job Search & Application - View job openings by location, skill, salary - Apply with one-click, track application status • Notifications - Email/SMS alerts for job matches, recruitment drives, interview calls, status updates
Recruiting Agency	Register, post jobs, view applicants, schedule recruitment drives and interviews.	• Agency Registration - Basic details, license info, past record • Job Posting - Create/edit job openings with specific criteria

		• Candidate Management - View applicants, download profiles, shortlist candidates • Recruitment Drive Scheduling – Set date/time, notify candidates • Interview Scheduling – Set date/time, notify candidates, upload results • Visa/Passport assistance to selected candidates
Govt/Authority (HPSEDC)	Approve registration of recruitment agencies, Overall portal management, generate reports.	• Approving the registrations of recruiting agencies • Approving recruitment drives schedules • Dashboard - Summary of total applications, placed candidates, job vacancies, pending verifications • Reporting - Generate reports by district, agency, skill, placement status

2.3 Candidate Registration and Profile Management Workflow

Candidate Profile Management

Key Steps:

Initial registration with Aadhaar/email verification → OTP-based SSO (HIM Access) login authentication. → Profile creation with personal details, qualifications, and experience. → Document upload (CV, passport, certificates) → Profile updates, including job role and country preference

2.4 Job Application Workflow

Job Application Workflow

Key Steps:

Candidate will browse available job openings → Use advanced search filters (location, sector, salary, experience) → View detailed job descriptions → Submit job applications with tailored documents → Track application status → Receive notifications for job matches, recruitment drives, interviews and related updates

2.5 Recruiting Agency Registration & Job Posting Workflow

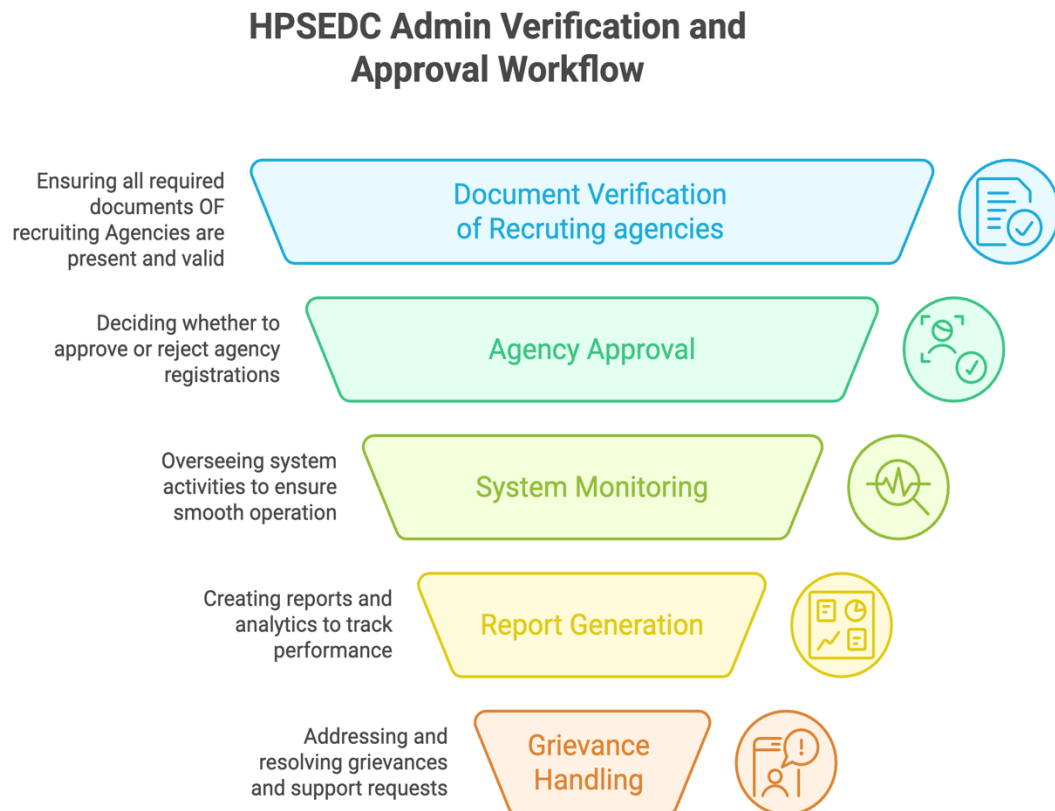

Recruiting Agency Registration & Job Posting Workflow

Key Steps:

Recruiting agency registration with company details → License verification and admin approval
→ Job posting with specific criteria and requirements → Manage job postings (edit, update, close)
→ View and manage applicants → Analytics on job posting performance

2.6 HPSEDC Admin Verification & Approval Workflow

Key Steps:

Authorities review recruiting agencies' registrations → Verify uploaded documents → Approve or reject agency registrations → Monitor system activities → Generate reports and analytics → Handle grievances and support requests

2.7 Recruitment Process Workflow

Recruitment Process Workflow

Key Steps:

Recruitment agencies organize recruitment → Employer reviews applications → shortlists candidates → schedules interviews with candidates → conducts interviews and records results → makes final selection decisions → issues appointment letters to selected candidates

2.7 Overall Workflow

Overall Workflow

Key Steps:

User registration and verification → Job posting and searching → Recruitment Drives by agencies → Application and matching process → Interview and selection → Placement and follow-up → Reporting and monitoring

2.8 Other Features

- Platform: Web application compatible with major browsers and responsive on smartphones and tablets, iOS and Android applications.
- Aadhaar/UIDAI verification (API) - SSO login (HIM Access)
- Integration with Digi-Locker for document upload.
- Email/SMS gateway integration
- MIS dashboard for administrators
- Multilingual Support

2.9 Design and Implementation Standards

- Ensure data encryption (HTTPS/TLS) and compliance with GDPR/PDPA-equivalent laws and GIGW guidelines.
- Limit custom development to essential features; leverage open-source libraries where possible.

3. Specific Requirements

3.1 User Interface/User Experience Requirements

- Clean, responsive design with navigation menus (Home, Jobs, Register/Login, Apply, Support).
- Software Interfaces: File upload for documents (PDF, JPG; max 5MB); Integration with email/SMS gateways.
- Communication Interfaces: Secure APIs for data exchange.

3.2 Non-Functional Requirements

- Performance: Page load <3 seconds; handle 5,000 concurrent users; 99.9% uptime.
- Security: Role-based access; encryption for PII; regular vulnerability scans; compliance with ISO 27001.
- Usability: Intuitive UI/UX; mobile responsiveness; accessibility features (e.g., screen reader support).
- Scalability: Cloud-based architecture for easy scaling.
- Reliability: Data backups; error handling with user-friendly messages.

3.3 Other Requirements

- Maintainability: Modular code design; documentation for handover.
- Testing: Unit, integration, and user acceptance testing mandated.
