

HireStream Mobile App — Quick Testing Guide

HPSEDC Overseas Placement Portal · Android & iOS · v0.4.16

HTIS Testing

Current build: v0.4.16.0 — confirm on mobile by checking the small `v0.4.16.0` tag at the top-right of the *Applications* screen header. Older tag? See [Page 3 → Old build / stale screen?](#)

1 Getting Started — Open the Verify Portal

1 Open the **Verify portal** in your browser:

<https://verify-stg.agentryx.dev>

2 You'll see "**Projects under verification**" — a list of projects to review. There are two project cards:

START HERE

HireStream — HPSEDC Overseas Placement Portal

Web portal for overseas employment placement services

This is the **web portal** — review this first

STEP 2

HireStream Mobile — Android/iOS App v0.4.16

Android mobile application for HireStream. React Native + Expo.

47 need fixing

CLICK THIS ONE

3 Click the **second card** — "HireStream Mobile — Android/iOS App v0.4.16" to open the mobile testing project.

2 What You'll See — The Project Page

After clicking the mobile project card, you'll land on this page. Here's what to look for:

Progress Overview

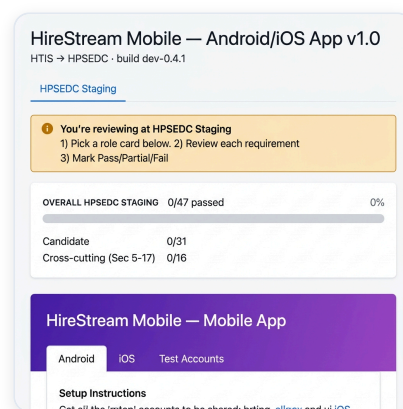

Shows overall sign-off status: **0 / 47 passed** (starts at 0%). Split into **Candidate (31)** and **Cross-cutting (16)** sections.

Mobile App Setup Guide

Purple panel with **Android / iOS / Test Accounts** tabs. Follow these instructions to install and test the app on your phone.

Role Cards (below the setup guide)

Click a **role card** → review requirements → click the **signoff circle** next to each → mark **Pass / Partial / Fail**.

Project page after clicking

3 Testing Workflow Summary

Step 1

Open Verify Portal
verify-stg.agentryx.dev

Step 2

Click Mobile project
Follow setup guide

Step 3

Install Expo Go
Test the app

Step 4

Sign off each
requirement on portal

Next pages: Page 2 has detailed Android & iOS setup instructions with screenshots. Page 3 has test accounts, troubleshooting, and sign-off details.

Mobile App Setup — Android & iOS

Install Expo Go · Connect to HireStream · Start testing

Page 2

A Android Setup (Recommended)

- 1 **Install "Expo Go"** — Open **Google Play Store** → search "Expo Go" → Install. (Free, ~60 MB)
- 2 **Open Expo Go** → tap **"Enter URL manually"** or **scan QR code** → (scanning will start loading the app)
- 3 **Enter this URL** → tap Connect:

`exps://hirestream-mobile.agentryx.dev`

⚠ Use `exps://` not `https://`
- 4 **Wait 15–30s** for the first load. Subsequent loads are faster.
- 5 **Login** — username `mobiletest` · password `Mobile@123`
- 6 **Confirm latest build** — open **Applications** tab. Look in the **top-right corner of the dark blue header** for the build tag. You should see `v0.4.16.0`. If you don't see it (or see an older version), use the force-refresh procedure on page 3.

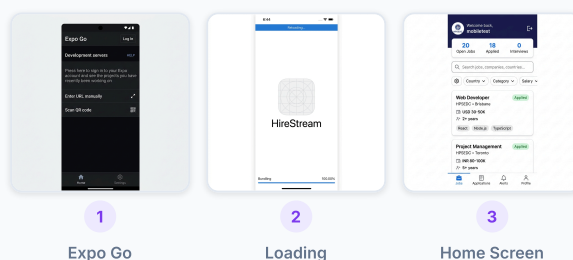

Scan to connect

`exps://hirestream-mobile
.agentryx.dev`

Troubleshooting: Won't load? Close Expo Go & reopen. Login fails? Case-sensitive lowercase usernames. Slow? First load is 15–30s.

WHAT YOU'LL SEE ON ANDROID

B iOS Setup (iPhone)

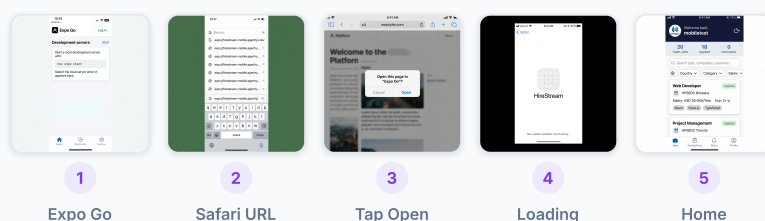

- 1 **Install "Expo Go"** — Open the **App Store** on your iPhone → search "Expo Go" → Install.
- 2 **Open Safari** (not Expo Go!) and **manually type** this URL in the address bar:

`exps://hirestream-mobile.agentryx.dev`

⚠ Use `exps://` not `https://` · QR codes do NOT work on iOS — type the URL manually
- 3 **Tap "Open"** when iOS asks *"Open this page in Expo Go?"* — the app will launch automatically.
- 4 **Wait 15–30s** for the first load → **Login** with same credentials above.

Why Safari? iOS Expo Go does not have "Enter URL manually" like Android. Type the URL in Safari — iOS will automatically redirect to Expo Go.

WHAT YOU'LL SEE ON IPHONE

Test Accounts & Troubleshooting

Login credentials · Common issues · Testing portal

C Test Accounts

USERNAME	PASSWORD	PROFILE	BEST FOR TESTING
mobiletest	Mobile@123	Candidate	Start here
priya_verma	test123	100% complete	Full profile, accepted placement
meera_iyer	test123	88% complete	Missing documents
demo_candidate	test123	Basic	Fresh testing
rohan_mehta	test123	Basic	Alternate account

[Same database as web portal](#) `hirestream-stg.agentryx.dev` — changes on mobile are reflected on web and vice versa.

D Troubleshooting

App won't load?	Force-close Expo Go and reopen it. Ensure you're on WiFi, not cellular data.
Old build / stale screen?	Force-refresh the bundle: Open Expo Go → long-press HireStream in the recent projects list → tap "Remove from list" → "Enter URL manually" → paste <code>exp://hirestream-mobile.agentryx.dev</code> → Connect. Fresh download (~30s). Confirm the build tag in the Applications header now reads <code>v0.4.16.0</code> or later.
Login fails?	Usernames are case-sensitive lowercase . Use <code>mobiletest</code> not <code>MobileTest</code> .
Very slow loading?	First load takes 15–30 seconds . Subsequent loads are much faster (~3s).
iOS: QR code doesn't work?	Expected. iOS does not support QR for Expo. Type the URL in Safari instead.
Red border on screen?	This is an Expo Go dev-mode indicator. Ignore it — it won't appear in production.
"Network Error"?	Check internet connection. The app connects to <code>hirestream-stg.agentryx.dev</code> backend.

E Verify Portal — Sign-off Testing

[How to sign off requirements](#)

- 1 Go to `verify-stg.agentryx.dev`
- 2 Open **HireStream Mobile v0.4.16** project
- 3 Click a **role card** (Candidate, Cross-cutting)
- 4 Click the **signoff circle** → Pass / Partial / Fail

[What to review](#)

Candidate (§1): 31 requirements — job search, applications, profile, alerts, documents

Cross-cutting (§5–17): 16 requirements — auth, navigation, notifications, performance, security

Total: 47 requirements to sign off

[Tip:](#) Use the "Needs fixing" filter on the Verify portal to see only items that need your attention. You can also submit feedback via the "Suggest an idea" button.
